

Nominations:	Funbot28	E4 Flint:	ScarfWynaut:
Kyogre-Primal: A+ -> S	No, although has many viable sets, none of them push it to the edge of S imo	no	nope
Mega Mewtwo-X: A+ -> A / A-	A. Still p threatening with Adaptability, just a bit easier to check offensively sans PSurge	A	A
Zygarde-C: A+ -> A	Yes, the 4x Ice weakness makes it more exploitable compared to Gira and also slight worse special bulk makes it a bit easier to break	ye	yes sir
Slaking: A+ -> B-	Keep alongside Giga	(same as gigas)	<
Solgaleo: A -> A-	Yes, post PsySurge not much incentive to run over stuff like Regi and Celest	ye	yep

Dialga: B+ -> A-	Yes, one of best wallbreakers / setup sweepers in curent meta mainly thanks to great bulk + power.	ok	^

Kangaskhan-Mega: A- -> B+	No, still one of best stallbreakers in the meta and is quite valuable on a majority of teams even though its rilly hard to build around	ye	^
Necrozma-DM: B+ -> B	No, while defensive sets are outclassed, offensive sets are still quite god and give it an edge over Solg at times. Also extra buk and lower speed gives it other niches	ye	abstain

Kartana: B -> B+	I would put this in A- as both Tinted Lens and Steelworker sets make it extremely hard to wall. BellyBurden sets are also quite good rn too	abstain	agreed
